

PHOTOELECTRIC BEAM ENCLOSURE (BEAM TOWER) MB-200

The MB-200 Beam Tower is a robust, discreet enclosure for the range of TAKEX photoelectric beams. The extruded aluminium frame of the tower ensures an attractive, compact and durable enclosure.

Features

- **MOUNTING HARDWARE**

The towers can be mounted directly onto a concrete base or mounted on the optional floor brackets set into concrete at the time of site preparation and cable installation. The MB-200 is supplied with stability brackets as standard for external use.

- **TOTAL FLEXIBILITY**

The towers can contain the TAKEX photoelectric beams providing single or multiple beam options with external ranges of up to 200 metres. The photoelectric beams are secured by the height adjustable fixings included with each tower.

- **TAMPER PROTECTION**

The towers come complete with a top cover tamper switch. To prevent an intrusion through climbing over the towers, a weight sensitive top tamper plate is available.

- **HEATERS**

For most external environments the towers can be fitted with a 12V DC (250mA) heater and thermostat arrangement, which is available as an extra.

- **FIXING KIT**

A full fixing kit including expandable bolts is included with every MB-200.

External Dimensions (mm)

- **MB-200 Dimensions**

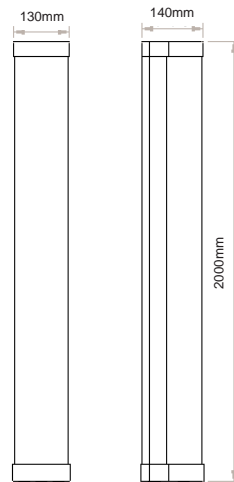

Width: 13cm
Depth: 14cm
Height: 200cm
Weight: 10Kg

- **MB-200 Optional Accessories**

MB-FB: Floor Bracket
